

• **STEP 5** •  
**ROOF INSTALLATION**

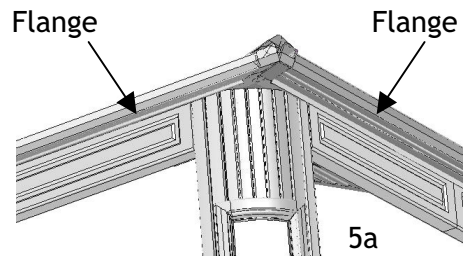

2 People Required

**Tools Required:**

Cordless Drill, (2) Step Ladder

An 8 x 8 Pavilion roof consists of 4 corner assemblies. Larger sizes will have two or more center roof sections.

**STEP 5a** · Start by placing a roof corner assembly up on to the completed wall. From the outside, slide assembled roof corner up until the flange on the underside of each corner aligns with the outside edge of the wall.

**STEP 5b** · From the inside install a roof header bracket half way on to each roof panel using (4) #10 x 1-5/8 wood screws and in to header with (2) 1 ½ screws and 1" washers. Repeat 5a and 5b to complete roof installation.
